

ALUMINUM FOLDABLE GOALS VS OTHERS

AGORA® Aluminum Foldable Goal

Other Comparable Goals

Ready To Use Out of the Box

Yes – net comes pre-attached onto the goal frame for instant use right out of the package. Simply unfold the goal and you're ready to go.

No – net comes detached from the goal and can be difficult to install. May take over 20 minutes due to tight or inadequate net sizing.

Aluminum VS Plastic Hinges & Components

Built with heavy-duty aluminum frame and reinforced aluminum hinges. This rustproof construction enhances structural integrity over time, especially under repeated use and in various weather conditions and UV exposure.

Many other goals feature an aluminum frame, however, with a combination of plastic materials and components such as plastic hinges and connectors, which can degrade faster under stress or UV exposure.

Weather Resistance

The brushed aluminum finish is naturally rust and corrosion resistant, and the aluminum parts hold up remarkably well under changing weather conditions.

While the aluminum frame of some other goals also resists rust and corrosion, plastic parts can become brittle or warp with prolonged exposure to heat or cold.

Structural Rigidity

Reinforced aluminum hinges provide solid support and stability, able to withstand intense play without sagging or wobbling, especially along the crossbar center hinge.

Some users may experience sagging or decreased stability (wobbling) over time, most notably along the plastic components and plastic crossbar center hinge.

1-Year Warranty Included

Yes – each new, original purchase comes with an AGORA 1-Year Frame & Workmanship Warranty. Terms and conditions apply. Visit website for details.

No – unfortunately, other goals only offer a standard one month of coverage and do not offer a 1-year warranty.
